

M.J Sections LTD is a global supplier of sheet metal fabrications into the aerospace industry. Our main customers include Rolls-Royce, Pattonair & Airbus. We are looking for a suitable candidate to come into the business in a predominantly sales role, handling all day to day quotations of new enquiries for parts, attending meetings with customers and engaging on an engineering level. A successful candidate would be involved in all new projects coming into the business and expected to manage their progression accordingly. The candidate would be required to build up relationships with new customers and service existing ones. We are ideally looking for someone with experience in engineering and sales and an aerospace background would be favourable. The position is going to be available as of January 2015. Interviews will be arranged with myself upon receipt of C.V / application and further information can be given.

Salary and hours to be discussed at the interview stage.

Experience working in the aerospace industry

Reading and understanding engineering drawings

Experience in engineering and quoting / sales background

Preparing quotations and logging conversion from quotes to orders

Strong personality and able to engage with customers / suppliers

Managing customer order books

Must be able to attend & host meetings when required

Must work well on their own as well as part of a team
